### SPECIFICATIONS

#### PERFORMANCE

Max. speed range	85 mph plus
Climbing ability	24 degrees
Min. turning radius	55.6 in.
Min. braking distance	38 ft @ 31 mph

#### ENGINE

Type	2 stroke, 5 port, Parallel-Twin
Displacement	249 cc (15.01 cu. in.)
Bore & Stroke	.56 x 50 mm (2.206 x 1.969 in.)
Compression ratio	7.3 : 1
Max. horsepower	30 bhp @ 7,000 rpm
Max. torque	25.1 ft. lb. @ 7,000 rpm
Lubrication system	Automatic
Starting system	Kick starter
Transmission	5-speed gearbox

#### DIMENSIONS

Overall length	78.2 in.
Overall width	32.9 in.
Overall height	41.9 in.
Wheelbase	50.8 in.
Min. ground clearance	6.3 in.

#### WEIGHT (Dry)

 324 lbs. |

**FUEL TANK CAPACITY** 7.9 gal.

**OIL TANK CAPACITY** 1.6 qt.

**TIRES** front 3.00-18-4 PR  
rear 3.25-18-4 PR

# YAMAHA 250 STREET DS6-B

Nothing succeeds like success. And Yamaha's success story in big bikes is the talk of the cycling world. On tracks around the world and streets and highways throughout the country, Yamaha bikes are proving themselves the master of all they meet, including some much bigger bikes. This new 250 is a powerful example of what we mean. Engineered for record-shattering stamina and engine performance from its big, super scavenging twin parallel powerhouse. And the engine's not the only thing special on this big beauty. The smoothness of the synchronized 5-speed transmission is amazing. And, as you'll find on every Yamaha bike—and only on Yamaha bikes—Autotube oil injection for a precisely accurate metering that has it all over the others. All the safety features you want and need are always yours on Yamaha. Brakes are big, fade free, and dust- and water-proof. And styling is a story in itself. To see its sleek lines from every angle and make the final saddle test yourself, drop in at Yamaha soon and catch up with the newest. Then the others will be trying to catch up with you.

It's a better machine

Super scavenging engine design has increased in power and performance. The power tap is a remarkable 2-stroke, 8-port twin parallel engine for smooth start, incredible speed and rugged endurance under all riding conditions.

Synchronized 5-speed transmission is matched perfectly, no missed shifts up or down. Quick and clean performance for the ultimate in riding ease. So much the gas you get a response that can only be described as "The Best."

Yamaha's exclusive Autotube Injection system, introduced several years ago, is still an exclusive Yamaha feature and still the best system ever devised. Better gas, and oil savings. Longer engine life. No messy mixing.

Big, built-in brakes are dust- and water-proof. The upper tube of weather safety performance on every solid surface. Non-slip tires bring an added measure of dependable traction no matter where you ride.

Smooth operation and endurance. Both big and required for convenience. Semi-reflective on both sides of your fork. Larger head and side lights. Meets all federal safety standards.
