Yamaha 250cc Single Enduro, Model DT-1B. Our newest machine destined for greatness. Get ready for the ride of your life on the most unique performer ever to be fitted with wheels – the 250cc Yamaha

DT-1B. With GP proven 5-port engine design, 5-speed gearbox, Yamaha Autolube and the highest safety standards, the DT-1B combines all the features demanded by experts.

MODEL DT-1B

available color candy gold only

www.legends-yamaha-enduros.com

A real champion for the man who demands performance.

Your first look tells you everything is exceptional about the new Yamaha DT-1B. Your first ride will convince you there's nothing ordinary about its powerful 5-port performance. With a big 250cc single cycle engine complete with Yamaha's 5-speed gearbox and Autolube, it is the most exciting motorcycle to come along in a century.

For all its speed and rugged performance features, the DT-1B is also one of the safest machines you can ride. It features all federally approved safety devices such as reflectors on both sides of the front forks and a big, easy-to-see brake light. Also for safety, front brake operation actuates the rear stoplight.

Flasher lamps are also available as an accessory item. Designed to conquer trails that stop other machines in their tracks, the DT-1B has an exceptionally lightweight frame, special travel forks, and nearly 10 inches of ground clearance. But the excitement generated by the DT-1B isn't all performance — it looks good too.

New golden tank panels and headlight trim, a handsome black upswept pipe with chrome guard, and separate speedometer and tachometer gauges help make the DT-1B the leader. For a whole new world of motorcycling performance, see and ride the DT-1B.

You'll go first class with the best available in power price range.

5-Port Engine Design: This is the Yamaha exclusive that still has the GP race crowds buzzing; a 5 port super scavenging system that gives the DT-1B an overall 10 percent increase in power and performance.

New Safety Features: Spot reflectors on both sides of the front fork for added safety. Tail light is activated by using front brake. Flasher lamps are available at option. All these meet federal safety standards.

Preferred by Experts: Lightweight frame that is both strong and flexible, detachable lights, nearly 10 inches in ground clearance, identically sized separate tachometer and speedometer and rugged travel forks.

SPECIFICATIONS OF MODEL DT-1B

PERFORMANCE

Max. speed range	70 miles plus per hour
