1982 MOTORCYCLE ACCESSORIES & APPAREL

This is a very exciting year for Yamaha Parts Distributors, Inc. We are producing many new, innovative items specially designed for our distinctive Yamaha machines—the Virago, Seca, Maxim, Heritage, Exciter, Tri-Moto and many others.

These new accessories feature tomorrow's technology—anticipating the trends, then satisfying those needs, by offering the items motorcyclists want.

In addition, we have also taken a major step towards making this catalog a more useful, functional piece for your dealership and for your customers.

The new ring binder system allows for quick and easy up-dating when new items are introduced so the catalog is always up-to-date.

The new tab divider system for separating the various sections makes it easier to find the precise items you are looking for.

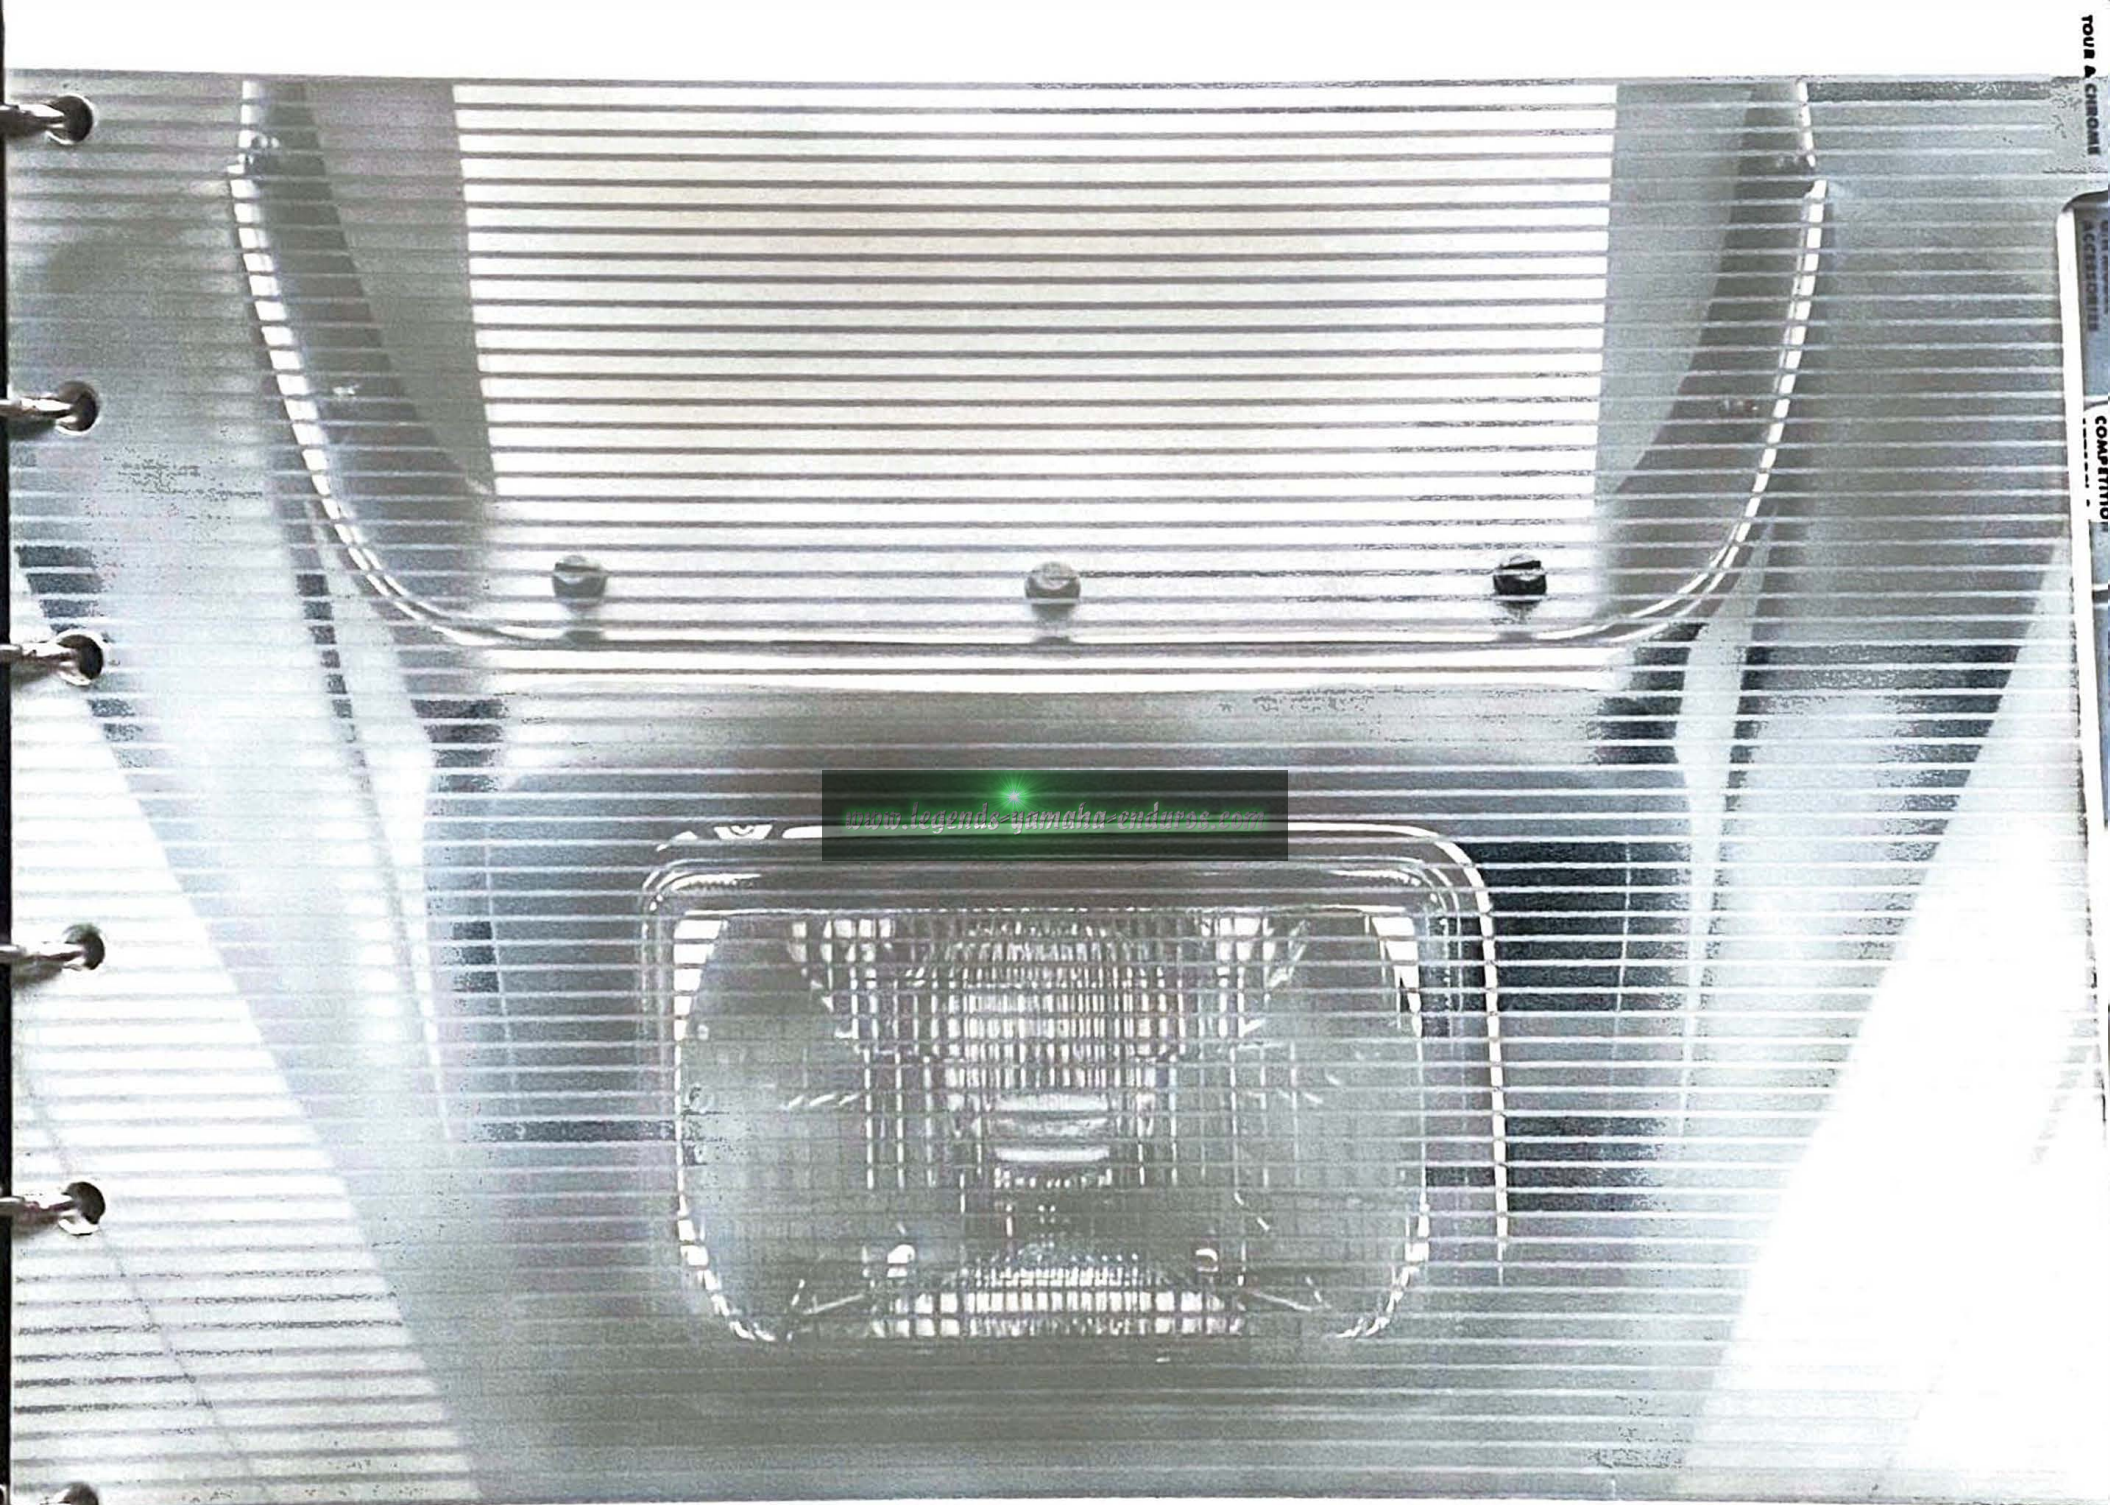

Also, the copy has been written direct and to the point, with the key features highlighted for fast reference. And the part numbers are prominently displayed, again for fast reference.

All this has been done to make it more convenient for your dealership and for your customers to find the accessories they want.

Yamaha Parts Distributors, Inc.

There's something very special about our Yamaha bolt-on accessories—they're all built the way they should be so they blend with the styling of the machine... and they're also highly functional.

Case in point, our new Seca 750 Sport Fairing. This particular fairing was specially designed to match the characteristic lines and awesome performance the Seca 750 is now well known for.

To design this fairing, we went straight to the wind tunnel at Jet Propulsion Laboratories in Pasadena, California (JPL is known for their testing with NASA for the United States' space effort).

Through extensive wind tunnel tests we discovered something very interesting—this fairing actually makes the Seca 750 more streamlined, increasing aerodynamic efficiency by 3.5%! This increased efficiency means that it improves fuel economy, plus it makes the Seca 750 look even racier than before!

And that's the way all genuine Yamaha parts and accessories are designed, because at Yamaha—that's the way it should be!

When you're talking performance, you're talking Seca. The Seca 750 and 550 quickly moved in and captured the mid-size performance market with startling quarter-mile times and rock-steady handling. Now, to make them even more appealing, we have a full line of sporty accessories, including our new, futuristic Sport Fairing.

A./B. Seca Sport Fairing

This revolutionary new fairing is the shape of things to come. As we stated on Page 1, this new fairing has been designed for performance, wind tunnel tested and proven on the open road. It's the only fairing we could build for the awesome Seca 750. Here are some of the outstanding features of this fairing:

Reduces wind resistance 3.5%.

Offers wind protection for the upper body. Color-coordinated to blend with the Seca's styling. Flaired windshield. Features an "easy-on, easy-off" mounting system and actually improves the fuel economy!

New Yamaha Black	ABA-5G202-00-24

Mini Engine Guards	ABA-5K531-00-00
Sofpack Tank Bag	ABA-4H764-00-00
Sofpack Saddlebags	ABA-4X773-00-00

C. Sofpack Tank Bag

Blends with the sporty Seca styling. The perfect way to travel, has over 1,000 cubic inches of storage space. Features a clear map pocket on top and there's an exterior pocket for small items. Constructed of rugged, weather-resistant, polyurethane-coated 400 denier nylon with Fastex® quick release buckles. Can be used five different ways, including as a tank bag, travel trunk, shoulder bag and, with optional straps, a backpack.

Sofpack Tank Bag	ABA-4H764-00-00
Backpack Straps	ABA-4H764-10-00
Extra Long Mtg. Straps	ABA-4H764-20-00

C./D. Mini Engine Guard

Offers excellent side case protection. Blends with the Seca styling. Constructed of tough steel with a nickel chrome plated finish. Easy to install and features a narrow profile.

Seca 550 & 750	ABA-5K531-00-00
----------------	-----------------

C./D. Sofpack Saddlebags

The perfect way to travel "Seca-style"—the total system weighs less than five pounds. Features over 1,100 cubic inches of storage space per saddlebag! Constructed of tough 400 denier nylon with heat reflective bottoms. Universal mounting system allows each saddlebag to be removed independently of the other. Comes complete with carrying handles, and Fastex® quick-release buckles. Turn signal relocation kit also available.

A. Supercross Jersey

Constructed of durable 50/50 polyester/cotton interlock for maximum strength. Features a "Track Graphic" knit sewn into the shoulder and side insert. Yamaha logo is prominently displayed on the front of the jersey and down the sleeves. Special three dimensional Yamaha logo and an elongated "tail" that won't pull out of pants, even when riding hard. Knit collar and cuffs.

Size Small	ACC-22200-02-01
Size Medium	ACC-22200-02-02
Size Large	ACC-22200-02-03
Size X-Large	ACC-22200-02-04

B. Supercross Pants

Rugged, durable 460 denier nylon outer-shell. Seat, knees and the inside leg sections are reinforced with abrasion-resistant "barrier cloth." "Track Graphic" spandex™ inserts are located on the outside seam of each leg for added comfort when riding or racing. Adjustable waist for a precise fit. Snap front for convenience. A special knit footlet keeps the pants in the boots. Lined with tricot for added comfort. Three dimensional Yamaha logo down both thighs.

Stand-up collar with Velcro closure system

Snapped flap over zippered front pocket

Extra long, heavy-padded back

Leather Jackets

These all-new leather jackets are more than just apparel items—they're actually functional, valuable pieces of riding equipment, specifically designed for motorcyclists to meet the rigorous demands of riding.

Constructed of top quality materials, these jackets feature specially matched Grade A top grain American cowhide leather. It's vat dyed and tumbled to produce a supple, scuff and scratch-resistant finish. Plus, it's the proper thickness for riding (1.1-1.3mm thick) because thicker leather does not breathe and is too stiff while thinner leather offers little or no protection.

Additional features include seams sewn with nylon thread to ensure long life. And all stress points are either double-row stitched and/or bar tacked.

The sleeves are set 15-18° forward to be more comfortable when riding plus the sleeve openings are tapered at the wrist and incorporate zippers for a more precise fit.

A. Maxim Leather Jacket

Features European styling and is designed with the rider in mind. Expandable side panels are made of gray leather-covered spandex and edged with red piping for maximum flexibility, comfort and appearance. Stand-up racer-style collar has a Velcro closure system and is corduroy-lined. Extra-long, heavily-padded back prevents ride-up when leaning forward plus it keeps kidneys warm in cold weather. Velcro flap over the front zipper ensures added weather protection. Ample pocket space for carrying valuables. Two front chest pockets feature snap and zipper closure systems. Leather under-arm patches inside the jacket ensure a long, useful life. Western-styled yoke adds that look of today. More than just a jacket, it's a serious piece of riding equipment. Subtle Yamaha identification snaps.

Size 44	ACC-33333-11-44
Size 46	ACC-33333-11-46

B. Midnight Leather Jacket

Basic black styling appeals to a wide variety of motorcyclists and non-motorcyclists alike. Racer-style stand-up collar keeps out the weather and features a Velcro closure system plus the inside is corduroy-lined for comfort. Velcro wind flap closes over the front zipper for added weather resistance. Extra padding in the elbows provides additional protection. Full quilted lining for excellent warmth. Ample pocket space, including an inside leather-edged pocket with button closure. Subtle Yamaha identification on snap. Inner leather patches under the arms have been added for long-term durability. There are also hand-warmer pockets and snap-top pockets specially integrated into the front of this jacket. This jacket is totally functional and fashionable.

A. Gran Prix Series Helmets

Our top-of-the-line helmet, it offers maximum protection. Constructed to Snell, DOT and SHCA specifications. It has a fiberglass shell with a polystyrene liner and features an injection molded shield that will stay open in an infinite number of positions, extra-wide chin strap for comfort and strength, plus one-piece D-rings (not welded). The paint and Yamaha graphics are covered with a tough clear top coat for maximum protection and beauty. The Grand Prix Helmet is extremely comfortable thanks to the brushed nylon interior with cheek pads and neck roll. Individual hat sizes for a precise fit. Available in full face style only.

Genuine Yamaha parts have always been fundamental to your business and to your customer's satisfaction. To keep this relationship strong, consider these features:

Genuine Yamaha Parts are specifically designed for a precise fit on Yamaha motorcycles (unlike some aftermarket, universal parts).

Warranty-related problems can be minimized by following the recommended service procedures and by using Genuine Yamaha Parts when replacement is suggested or required. And all Yamaha Parts are engineered to deliver the highest level of safety and the lowest level of risk.

Simply put—stock, recommend and sell Genuine Yamaha Parts to your customers and use them in your Service Department because they are the best on the market and reflect the fine craftsmanship that Yamaha is world famous for.

For part numbers and applications for these genuine replacement parts, see new Hot Items parts catalog or fiche.

A. Batteries

Premium quality batteries manufactured to Yamaha's specifications by leading manufacturers, such as Yuasa and GS. Batteries are exact replacements, require no adaptation.

B. Spark Plugs

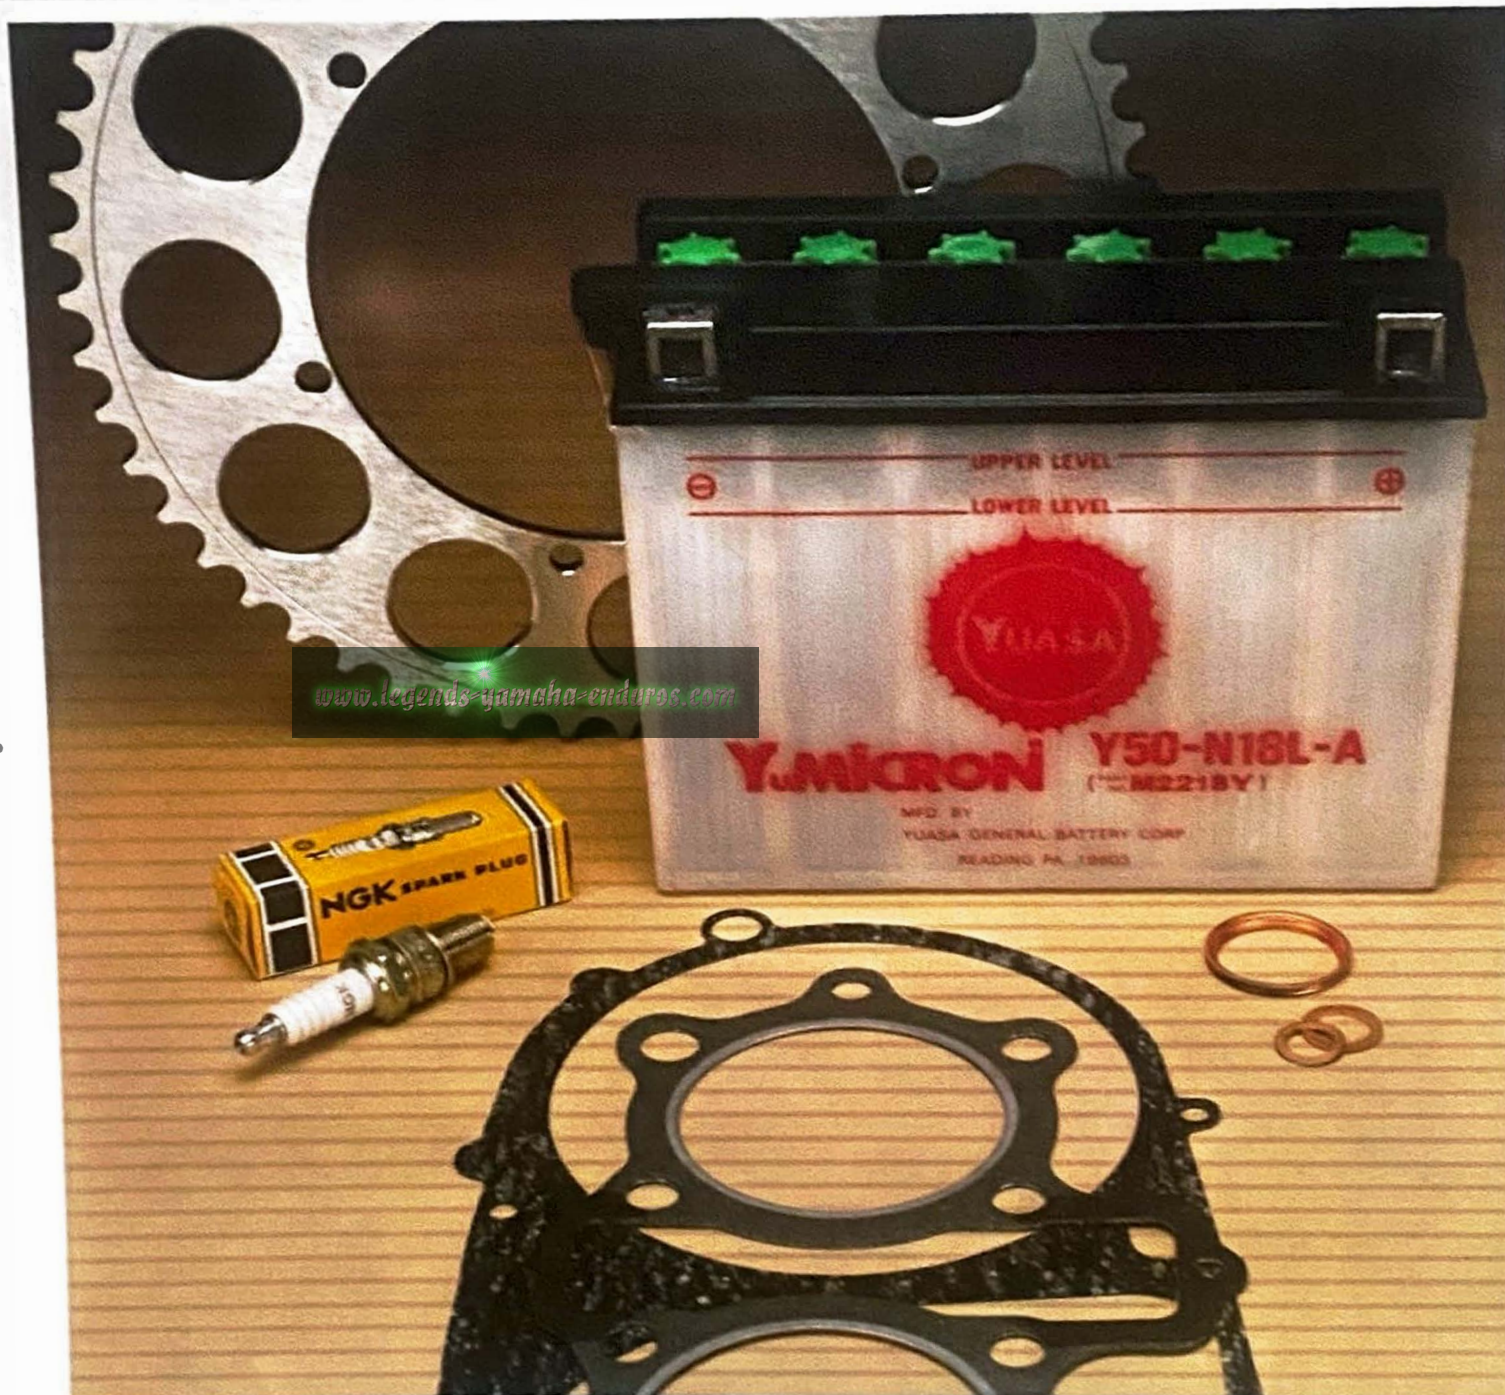

We carry a wide variety of quality NGK and Champion spark plugs for Yamaha applications.

C. Gasket Sets

Complete gasket sets. A real timesaver when rebuilding an engine.

D. XX Sprockets

Constructed of tough, durable aluminum alloy. Available for a wide variety of Yamaha models.

A. Mirrors

B. Street Tires; C. Off-Road Tires; D. Dual Purpose Tires; E. Tubes

F. Chain

G. Tune-Up Kit

A. Mirrors

Available in a variety of shapes and configurations to fit most Yamaha models. Easy to attach, they utilize stock mountings in most situations.

B. Street Tires

Available for most Yamaha street bikes. Specifically designed to provide optimum ride, handling and durability.

C. Off-Road Tires

Various styles are available for different off-road needs. Offer maximum traction in the dirt. Rugged, durable performers under all off-road conditions.

D. Dual Purpose Tires

Designed for machines that do double duty—on street and dirt. Provide good traction in both mediums.

E. Tubes

Available for most Yamaha models.

F. Chain

Constructed of superior materials for reliable, dependable performance. Must pass three tests: tensile strength, fatigue and impact to guarantee their durability.

G. Tune-Up Kits

Kits come complete with everything to do an ignition system tune-up—plugs, points, condenser and a feeler gauge. Available for a variety of Yamaha models.
