IT'S THE 100 TRAILMASTER (L5-T)

Sprocket-changing days are over! A new trail bike with electric starter and new "trailmatic" transmission. Three speeds in low range, three in high—in effect, six speeds forward. A range for street riding and a range for trail blazing. And the changeover is made with the turn of a dial.

OUR 80 TRAILMASTER (YG-5-T)

Back by popular demand, this rugged 80 has earned its reputation. With these proven features: electric starter, big tires, 7-bone frame, drum-shift transmission. Speeds of 40 mph plus.

THE NEW 250 SINGLE ENDURO (DT-1B)

Designed for expert rough-country riders. 5-port power. Tapped head and plug for compression release. Five speeds. 70 mph plus. Enduro forks (5.8 inch travel). Other features: quick-detachable lights, separate tach and reset speedometer, spring-loaded foot pegs.

INTRODUCING THE 175 SINGLE ENDURO (CT-1)

Is the 250 Enduro too much bike? Then try 175cc with 5-port power. It takes you over any terrain. Easy. Special Enduro front forks. High-riding frame. Standard features include adjustable rear shocks, 5-speed transmission, Autolube oil injection, detachable lights, spring-loaded foot pegs, separate speedometer and tach.
