

Yamaha Street

- Sort of an instant shortcut.

650 XS-1

Even the sound of this one will turn you on. It's our brand new 650cc 4-cycle twin with 5-speed gearbox and a new way with the open road.

200 CS-3C Street/Scrambler

The handling of our 200cc twin makes riding fun. Autolube oil injection, separate instruments, a 5-speed gearbox and electric starting make it easy.

80 G6-S

A lightweight rotary-valve single with waterproof, dustproof safety brakes, racing tank and seat and Autolube. The fun machine for the young.

250 DS-6B

Descended from our racing machines it has a 5-port power twin mated to a 5-speed gearbox. Call it Son of Daytona.

YAMAHA

It's a better machine

125 AS-2C Street/Scrambler

Enough five-port power to make it on the freeway, plus 5-speed gearbox, Autolube and the kind of handling you want on twisty back roads.
