## YAMAHA MINI-ENDURO JT2

JT2, the machine that everybody can ride and enjoy. A really versatile small bike that is equally at home on the trail as on the street with large head lamp and stop lamp as standard equipment. The smooth 4 speed transmission combined with the superior rotary valves provide excellent acceleration and instant response. With young friends or the family, the Yamaha JT2 will satisfy your every need when camping, fishing or on a picnic.

## YAMAHA MOTOCROSS **JT2-MX**

This rugged little machine is a real scrapper on the motocross tracks with its durable front forks, raised fenders and unique muffler design. The 4 speed transmission and the highly efficient rotary-valve engine team up to give the smoothest and most carefree ride ever. This model has been especially designed for use on the farm, ranch or general off the road riding, therefore the horn and headlight are not attached.

**NOTICE** The JT2-MX is not manufactured for use on public streets, roads or highways. Such use is prohibited by law.

The unique rotary-valve engine was designed by YAMAHA engineers to develop an amazing amount of power to ride the roughest trail. This superior engine design is characterized by instant throttle response, efficient and economic operation, and longer life.

The ultra-smooth 4-speed transmission allows the rider to fully concentrate on the road or trail without worrying about missed gears or jerky operation. The positive action of the foot-lever assures you of the correct gear for power in reserve.

Autolube—the design that made motorcycle history—is standard equipment on all YAMAHA 2-cycle engines. This precision system eliminates the need for premixing the gas and oil by automatically supplying the correct amount of oil for all engine operating conditions.

The front forks are the most durable found on any enduro machine and designed to smooth out the roughest trail without sacrificing any of the excellent maneuverability characteristics that have made YAMAHA the choice of champions throughout the world.

Nighttime riding is also perfectly safe with the extra-bright headlight that allows the rider to both see and be seen.

JT2-MX—the really fun machine has been especially designed for off-the-road operation on the track, trail or just around the house, therefore the headlight and horn are not included.

Safe, controlled stops are assured on any riding surface in any weather with the large, dust and waterproof, fade-free front and rear brakes.

The Yamaha Mini series, JT2 and JT2-MX, designed for both young and old... the family machine. The name "Mini" means the bike is small, however there is nothing "small" about the research which went into the Autolube system, or the superbly designed engine that lies

beneath its compact exterior. The operation is simple so that the rider is "busy" just having fun. The ideal holiday bike for picnics, or camping... the YAMAHA Mini series, JT2, JT2-MX. These models will help you discover a newer life.

It's a wonderful world of kids, large and small. No bigger thrill than to watch their faces when you give 'em their first machine, or take 'em on a trail ride... or just sit back and watch 'em learn to ride. It's a happy world and it's yours... from YAMAHA.
