

DISCOVER THE WILD LIFE

Out there, 40 miles from nowhere, that's when you really start to appreciate

Appreciate our Enduro forks. Our 5-speed, all-synchromesh transmission. Our automatic injection system.

125 cc with electric starter. Nobody else has it. And if you stop on the side of a hill without a leg to stand on, you'll know why we've got it. There's more. Lots.

Like 5-port preet. Dust-free, waterproof brake springs. Loaded foot pegs. Heat exchanger.

Too much for here.
