FEATURES

- **Aerodynamically-designed fairing.** Engineered to cut drag and channel air flow to the engine and radiator.
- **Air-assisted 39mm diameter front forks** are matched with integral fork brace for excellent damping and front end controllability.
- **Stopping power** is afforded by a floating 4-pot front brake of 320mm with opposed piston caliper disc in the rear.
- **Cornering at high speeds** is a breeze, especially when you're doing it on 43mm hollow spokes.
- **Rising-rate Monocross suspension** makes

use of a rectangular aluminium swingarm and De-carbon gasoil shock for added performance.

- **The aluminium dellabox frame** is fresh from the World GP racing circuit. High torsional rigidity. Low steering head for shorter, flex-free forks.
- **The TZR utilizes YPVS.** Employing a spiral shaped valve on top of the cylinder's exhaust port that adjusts the exhaust timing to match the rpm automatically. Optimum 2-stroke power output a power band width.
