"A new idea in recreation fun" is the very fitting description of this completely new concept in leisure pleasure. Designed from the ground up especially for fun-loving young people and young-thinking fun people, this model represents a significant departure from conventional motorcycling ideas. It does have a mighty good engine, for its class, which is extremely efficient and reliable. And it does have all the features which have made Yamaha bikes famous around the world for action, thrills and rugged dependability. But, although you may enjoy all of these features on the JT1J, you'll find that the biggest thing about this model is its difference, its versatility

and its fun. It's a lot of fun... in its place... and its place is down on the farm, around estate grounds, out at the ranch, in the open prairies, along forest trails, in big-city traffic, small town lanes, cross-country highways....any number of places you might have time for a new experience in economical, practical, safe and comfortable fun. It's ideal for recreation of every kind: camping, hunting, fishing, motorhiking, picnics, exploring....group fun or just all by yourself....either way it's a totally new experience. Yamaha's JT1J is, we think, one of the most pleasant experiences you've ever had in outdoor leisure time enjoyment.

# ANYBODY...EVEN YOUNGSTERS...CAN RIDE THIS ONE

Just insert the key. Convenient ignition located for quick and easy starting.

Easy choke operation makes starting easier, faster and more efficient.

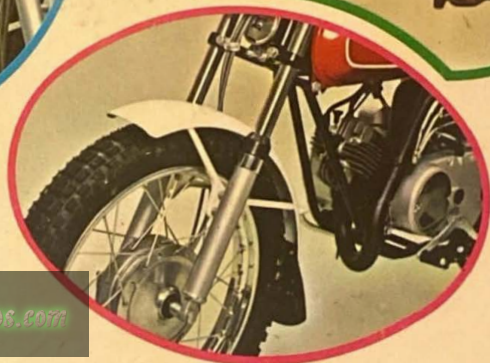

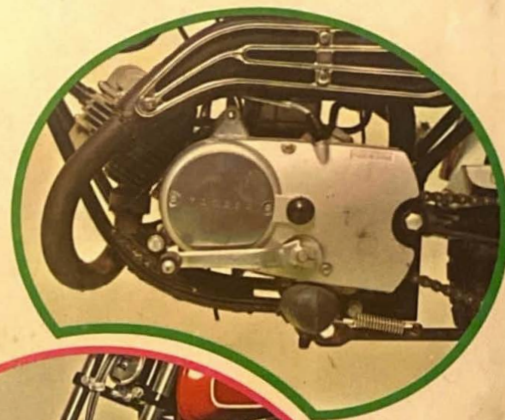

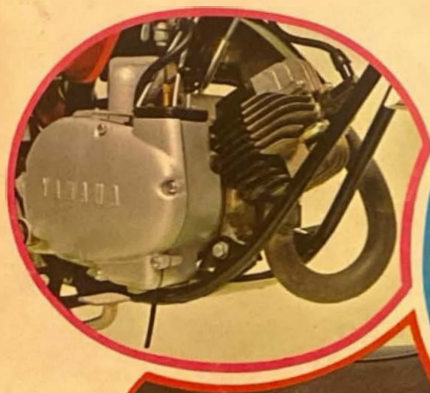

A light kick and it's started. So easy for women and children.

After starting, simply hold the clutch in and shift with your toe. Apply acceleration while releasing the clutch and you're on your way.

## YAMAHA MINI-ENDURO JT1J FEATURES

[www.legends-yamaha-enduros.com](http://www.legends-yamaha-enduros.com)

In spite of the JT1J's compact size, the engine is the famous Rotary Valve engine design of which Yamaha is so proud. Very powerful for its class, the JT1J features superior pickup and surprising cruising ability.

Yamaha's world-famous Autolube automatic lubrication system has been widely acclaimed as one of the greatest advances in motorcycle design in recent years. Meters the oil supply, just enough, never too much or too little. Improves engine wear and eliminates messy gas/oil mixing.

Both braking systems, the foot brake and the hand brake, are completely reliable in any weather and on any surface, and are easy and convenient to use. And, because they're both waterproof and dustproof, safe riding is assured wherever you are.

The super-smooth 4-speed transmission is one of the easiest and nicest parts of the JT1J. A simple flick of your toe and you're right in the gear you want. Never a missed shift. No clashing or grinding. Makes this model just about as easy as a bicycle...and a lot more fun.

Even the bumpiest surface...rocks, pot holes, chuck holes, ruts...are smoothly absorbed by the amazing front forks of this model. Designed especially for off-the-road riding, these forks cushion every bump, making riding both safer and a lot more comfortable.
